

# Rectifier Kit for DC floor machines.

otherwise known as permanent magnet motor.

part # 7A95820

This kit consist of the following items:

Rectifier for DC motors fors Centaur, Clarke, Pullman-Holt, Advance, NSS, Tennant, Viper floor machines.

### Installing the rectifier.

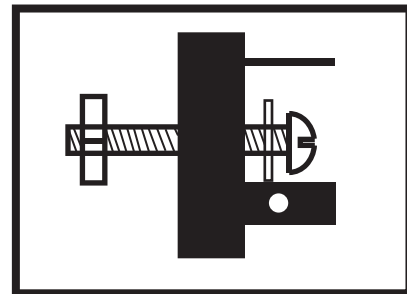

After removing the old defunct rectifier, smear a small amount of "thermal compound" on the flat side of the new rectifier.

This will help dissipating the heat and extend the rectifier life.

Re-assemble following the Sequence of assembly show on the picture #2.

Then tighten nut to 30 in.lb. The proper tightening is very important. Failing to tighten nut to 30 in.lb may render rectifier to a premature failure
